Increasing Reimbursement Policies and Better Healthcare Facilities will Help North America Dominate Market

Regionally, North America earned a revenue of USD 280.46 million in 2019 and emerged dominant. Factors responsible for this growth include the rise in government initiatives for enhancing the healthcare sector and medical facilities in the region, coupled with the reimbursement policies and flexible regulatory scenario. On the other side, the Asia Pacific market will rise at a rapid CAGR in the forecast period on account of rising penetration of new vendors into the regional market, coupled with the rise in expenditure on healthcare infrastructure and equipment development in the emerging economies such as India, China, and others. Furthermore, the increasing prevalence of chronic diseases that ails efficient diagnosis such as neurological disorders and cardiac issues will help Latin America and the Middle East and Africa markets witness stable growth.
